

MOLD PREVENTION

Get rid of mold in your home and keep it from coming back!

Moisture issues

Control it

Fix leaks. Keep excess moisture from accumulating in your home as quickly as possible. Get things dry!

Remove

visible mold

Washable items: Wash with soap and water. Some items may need to be replaced.

Control humidity

Use a hygrometer or humidity monitor. Humidity monitors are available at most hardware stores.

Improve ventilation

Open windows. Turn on mechanical ventilation systems (HRV or other). Turn on fans, especially when cooking or showering. Make sure these actually blow outside.

Wear your PPE

Wear gloves, goggles, and eye protection when managing mold.

Kill remaining mold

After removing visible mold, wipe the area with a bleach solution (1 cup bleach to 1 gallon water). NEVER mix bleach with other cleaning products.

Symptoms

Hay fever, sinusitis, irritated eyes and throat. People who are allergic or have asthma may be more sensitive to the allergens.
